

## About Saile

Saile Technologies is an IT Integration and Enterprise Transformation company that primarily serves the government sector. Headquartered in Southern California, we provide technology, business, and engineering services to military, civilian federal, and local government clients. We have successfully provided a broad spectrum of information technology, business process automation, and operations support services to government for more than 17 years with a 100% success rate.

## What Sets Us Apart

What differentiates us from our competitors is exceptional insight of government operations, extraordinary people skills, and a unique ability to provide innovative solutions that enable agility within government organizations. Our services are geared to:

- Support agency goals and objectives
- Save government money
- Innovate and transform government processes
- Increase productivity and reduce complexity
- Adequately protect agency information
- Obtain the best results for the agency

## Contract Vehicles
